\$1,100,000

PROJECT OVERVIEW

This unique project of a historic building at Moffett Federal Airfield affected all the major components of this building. While adhering to SHPO requirements, the project team carefully went about the renovations to include new components. The major components consisted of all new HVAC, electrical panels/distribution, generator/ATS, lighting ring, communication tower, roof/siding panels, asphalt driveway, concrete walkway, and steps. The interior components included new doors, windows, IT data cabinets/ladders system, ceiling system, fire alarm system, lighting, drywall repairs, and new paint throughout.
