

Pacific Ceramics, Inc.

Santa Clara, CA

PROJECT OVERVIEW

Pacific Ceramics, Inc., a world-class manufacturer of advanced microwave ceramic materials, hired Iron Construction to provide intense and highly advanced improvements to their manufacturing facility, offices and process rooms. Improvements consisted of a new waste water treatment system including solid waste interceptors, neutralization tank and over 1,100 feet of Dead Level D trench system. A new comprehensive HVAC system with a 14,800cfm makeup air unit at its heart was installed, as well as upgraded fire sprinklers and a new comprehensive fire life safety system (tied into BMS). Office renovations included a new lobby, restrooms, break room, conference rooms, offices, QA, QC labs, and IT room.
