PROJECT SIZE

4,700 SF

COMPLETION DATE

September 2020

PROJECT OVERVIEW

4,700 SF TI renovation of office and common space area of an existing high-rise office building. These upgrades combine high-end finishes with natural elements such as a wood plank wall, planter in the elevator lobby, and live edge wood tables for a refreshing change from standard commercial office buildings.

Among the additions is a new open office configuration including perimeter offices with glass walls, wood doors with glass panels to highlight the views of Silicon Valley. Upgrades include modern ceiling light fixtures, high-end breakroom finishes, and polished concrete among the common area flooring. The space includes large tile layout in the restrooms with backlit mirrors, surrounded by accent tile, stainless-steel accessories, new carpet, and paint.
